Activate the webcam via the 'On/Off' switch. To enable the camera, accept the web browser's prompt to allow your camera and mic to be used by 'alfred.camera'. Motion Detection also needs to be turned on so that the webcam knows when to record and send notifications. Click in the bottom right corner of the camera feed to activate it. If you already logged in to an existing account in step 1 and have the app downloaded, check AlfredCamera on your phone—motion detection notifications should already start appearing. If not, download AlfredCamera to your phone, or head toWebViewer in another tab to view your camera feeds on the web. What is the difference between a webcam and a security camera?With AlfredCamera, there isn't a difference! AlfredCamera transforms webcams into fully-functional security cameras, just as it transforms phones and tablets.All these devices can be used alongside one another and the AlfredCam hardware line to create your own DIY security system.Get started now by heading to AlfredCamera WebCamera.While webcams might be overlooked as a viable security option, they are really handy in a variety of circumstances. Discover some of the scenarios where using a webcam as a security camera keeps you secure. Cafes, libraries, and shared office spaces are great for getting work done, but not so great when you need to use the bathroom. When frequenting these spaces alone, bathroom breaks mean leaving your stuff under the watch of a total stranger or having to pack it away completely. Neither solution is ideal. Use AlfredCamera WebCamera to monitor your things from your laptop for free if you have to step away for a second. Motion Detection will notify your phone as soon as something passes by. Webcam security camera software significantly eases the anxiety of leaving your things in unfamiliar accommodation. Let AlfredCamera WebCamera keep an eye on things while you're out for the day. Tap in periodically, get motion detection notifications, and keep much needed evidence in the event of a theft. Always check relevant consent laws around recording in your location beforehand. In our article on Airbnb security, we highlighted some of the potential risks of staying in an Airbnb. While they are generally safe, Airbnb has less regulations governing how properties operate than conventional hotels and rentals do. There are no prohibitions on guests using surveillance while they stay (assuming the host isn't also present), so webcam security camera software is a useful way to keep an eye on things if you feel suspicious. Building a DIY home security system is troublesome when multiple camera devices are needed to cover all your bases. Cut on costs by adding a variety of phones, tablets, and webcams to the mix via AlfredCamera. With Alfred, there's no limit to how many camera devices you can add. Ready to DIY your home security? Go Premium!Build a more robust DIY home security system by joining Alfred Premium.From just \$2.49 a month, Premium users get twice as much event storage, advanced motion detection features, and the ability to access live feeds at the same time as two other users.All this makes for a more effective and convenient DIY home security system that doesn't sacrifice your wallet. Learn more about Premium to get started. While old phones are excellent security cameras, a webcam works just as well if you don't have any old phones or tablets lying around. Simply leave AlfredCamera WebCamera online on a laptop or computer and the webcam security camera software will do its thing. External webcams with large USB cables are surprisingly effective alternatives to hardware security cameras, since it's easy to place them far from the computer. Visit AlfredCamera WebCamera to use your webcam as a motion detecting security camera. Log in or sign up, then follow the onscreen instructions, ensuring you turn on motion detection when given the option. This transforms your webcam into a free motion detector in seconds.Anyone that passes by the webcam will trigger a push notification to your phone and record the event. You don't need special software to use your webcam as a security camera because AlfredCamera WebCamera provides free webcam security camera software online.Enabling the webcam to be used as a camera and viewing the live feed are both easily done via your web browser. Make sure your webcam is plugged into your computer via the USB. These are generally inexpensive. Then, head to AlfredCamera WebCamera to begin using it as a security camera. Smartphones and tablets can be used as remote monitors for webcam security cameras via AlfredCamera. Once you've enabled your webcam to be used as a security camera with AlfredCamera WebCamera, monitor it remotely via the AlfredCamera app on Android and iOS devices. Notifications triggered by the webcam are sent to devices with the app installed. There's no limit to the number of camera devices you can use on AlfredCamera, so any and all webcams, phones, and tablets can monitor multiple rooms. If you have multiple laptops, for example, the webcams on all of them can be allocated as camera devices. Webcams are a little known secret in your security arsenal that are useful in a number of different circumstances. Experiment easily using AlfredCamera, to get even more security cameras suitable for use alongside phones, tablets, and the AlfredCam hardware security camera. Pro Tip: What does a webcam allow you to do?With a webcam, you can:1. Skype and Zoom video conference for work2. Stream video games live3. Use it as a security camera with AlfredCamera WebCamera4. Set up Face IDS. Remotely catch up with family and friends Keep everything you love protected from just \$2.49 a month. With features like continuous recording, motion detection recording, low-light filters, and remote access, AlfredCamera offers an extra layer of protection as well as peace of mind.When selecting a home security camera, consider factors such as video resolution, field of view, night vision, storage options (local or cloud-based), and connectivity features. Determine the areas you want to monitor and choose cameras that match your specific requirements.AlfredCam is the perfect entry-level home security camera, purpose-built to provide simple, effective home security. Existing AlfredCamera users can easily expand their setups, while newcomers can now get started with AlfredCamera even if they don't have spare phones or other devices.Yes, home security cameras can be accessed remotely. AlfredCamera offers remote access to live feeds and recorded footage through its dedicated app, as well as on the web via WebViewer. The Viewer device and Camera device don't need to be connected to the same Wi-Fi network to function, meaning you can check your live feeds from anywhere that has an Internet connection. With AlfredCamera, you can easily monitor live feeds in real time, receive motion alerts, and manage camera settings from anywhere with an internet connection, making home security as flexible as it should be.For AlfredCamera users, setting up a home security camera system involves pairing a variety of devices to be used as extra eyes and ears. This includes spare phones, tablets, computer webcams, and our dedicated hardware security camera, AlfredCam. Follow our step by step guide to get started.AlfredCamera lets you add an unlimited number of devices to an account, making it easy to set up a DIY home security system on a budget. Simply select different locations around the house, ensuring a stable mounting surface, and pair your devices to the app. Once camera devices are paired, you can explore and configure camera settings in the AlfredCamera app.For AlfredCam users, you need to plug in AlfredCam and connect it to a Wi-Fi network to activate it. If you still have trouble getting started, check out our detailed overview of AlfredCam, where we introduce the device and how to set it up.Note: AlfredCamera relies on a stable internet connection to stream live video and store video footage in the Cloud. For more information on how to improve internet stability, check out the following guides:Home security cameras can be used in various scenarios, like monitoring your property when you are away. They are useful for both primary residences and vacation homes, and can operate 24/7. Position your home security cameras strategically to cover vulnerable entry points, such as doors, windows, and driveways. Place them high enough to prevent tampering or obstruction. Consider the field of view and adjust camera angles to cover the desired areas, minimizing blind spots. Indoors, position cameras in common areas or where valuable items are stored. Need more placement ideas? Check out where AlfredCamera users place their cameras indoors and outdoors.Some home security cameras can be used both indoors and outdoors if they are sufficiently water and dust proof. The upcoming AlfredCam Plus is perfect for both indoors and outdoors, while AlfredCam and spare devices are intended for indoor use only, unless the spare phone or tablet being used is waterproof.Regularly check camera functionality and perform updates to ensure optimal performance.Use strong, unique passwords to prevent unauthorized access to footage.Configure security features like AlfredCamera's App Lock to better protect camera feeds.Notify and inform all household members and visitors about the presence of cameras to respect their privacy.Avoid pointing cameras towards areas beyond the boundary of the property or areas where privacy is expected, such as bathrooms or at the windows of neighboring properties.Consider using features like motion detection scheduling to get surveillance only when you want it.Regularly review and backup important recorded footage.Available on Apple® and Android™ devices. Repurpose your spare phones, tablets, or webcams as security cameras. I have a tablet set up as a "roomer" that I place wherever it's needed in the house as well...MoreJon TimkoYes, two devices are needed to start using AlfredCamera. One will act as the Camera device, while the other will act as the Viewer device, which is where you view the live feeds and captured footage.We recommend using your regular phone as the Viewer device. That way, you can access live feeds wherever you are and get useful push notifications in real time.The Camera device could be a spare smartphone, tablet, or even a computer webcam.The AlfredCamera app works on Android and iOS devices as well as on web browsers. It is also compatible with our first indoor security camera, AlfredCam.We love DIY, so we always recommend repurposing old phones as security cameras where possible. You can then flesh out your DIY home security system with AlfredCam Viewer Device Requirements Android 5 (Lollipop) or aboveiOS 12 or aboveWe recommend that you use your regular phone as a Viewer device.Camera Device Requirements Android 5 (Lollipop); Camera Android 4.1 or above (for a better experience, operating systems above Android 5 are highly recommended)iOS 12 or aboveVisit our help center for more details on compatible devices.To use AlfredCamera, a Wi-Fi network is required for initial setup. Camera devices must be connected to a Wi-Fi network to send and receive data to and from your account. You can use a Wi-Fi network or mobile data on your Viewer device (aka your current phone) to access your live feeds and stored footage from anywhere.Most users will connect their Camera devices to their home Wi-Fi network for optimal use. To find out how to get the best connection, check out the requirements.You'll be able to watch the live feed captured by the Camera device from your Viewer device once you have successfully paired them.All connected Camera devices are stacked on the main menu of the app, which you'll see as soon as you open it. Tap them to view the live feed!Don't panic if you haven't heard of QR code pairing before! We lay out the step-by-step process in this short tutorial video.Connecting devices is done easily by generating a QR code to be scanned on the main viewing device (i.e. your current phone). After you've tapped to add a camera, a QR code will appear on the Viewer device.Hold up the QR code for the Camera device (whether that's AlfredCam or a spare mobile device) to scan, keeping it at a distance of 6 to 12 inches. It will then pair.When you open the AlfredCamera app on your Viewer device, all live feeds are stacked on the main tab. Tap them to view the live feed. If you have more than one camera device connected, you will need to view each feed one at a time.Add as many cameras as you need. We encourage experimenting with setups that cater to your specific monitoring needs so that you can build your own security camera system, free of limitations.Your privacy and security are our top concerns. We have established strict policies and technical barriers to prevent unauthorized access to your data. With the support of top-tier cybersecurity mechanisms—W3C, Google, Android, and Amazon—AlfredCamera is equipped with the most advanced protection.Premium is available for \$5.99 a month/\$29.99 a year (\$2.49 per month). I had used AlfredCamera in the past to watch over my pet if he were home alone or when my child was napping. I set AlfredCamera up and left for a walk. Within a few minutes I caught the thief on film. I hate thieves, especially when you are all alone and scared in an unfamiliar place. I fled my abuser and had almost nothing just like all the other women there. She was told she had to leave, and from then on there was not another problem...MoreBlaine Mcguirel have 2 old cell phones set up as AlfredCamera cameras to watch over my baby. It has been a lifesaver!Doggny Nanny Cam! My 2 year old Great Dane, Archer, is too big for a cage or kennel. So with the help of AlfredCamera, I can safely give Archer his own bedroom. I have 2 old cell phones set up as AlfredCamera cameras to watch over my baby when I am not home. It has been a lifesaver! Literally! About a year ago, I was able to rush home the moment I found the dog trying to eat a dryer sheet that must have been stuck to his bedding. I used the speaker feature to tell him to stop chewing on it and got home before he could swallow anything dangerous! Although.... It does look a little strange when I am sitting in a restaurant yelling at my phone "BAD DOG....PUT THAT DOWN!" LOL!...MoreSavannah DennisAlfredCamera has been a huge help for people with epilepsy!I have had epilepsy for 25 years and most of my seizures occur at night thus I do not know when I have them all. I have use this to record myself sleeping, and when the motion activation is used it begins recording when a seizure happens, providing info I can share with my doctors. I have also mentioned this app to epilepsy groups as a possible aid for others who need help....MoreHalle WolffIt is very convenient because you can check the status of your room.I evacuated to an evacuation center when Typhoon No. 19 came, but I was worried about the situation in my room during that time. I installed this app so I could grasp the situation of my room even when I was out. It is very convenient because you can check the status of your room...MorePhillipa LynnGet a month of Premium for the price of a cup of coffee.Stay in the know!Apps such as Alfred can turn old phones into makeshift security cameras you can check remotely from your current phone or from the web.Alfred is free to use and gives you a two-way live feed, motion detection with alerts, a two-way audio feed and use of both the front and rear cameras.If you're looking for the best security cam app to turn an old phone into a security asset, Alfred is your pick. This excellently designed app is installed on two phones — one for using your phone's camera as a security cam, and one for controlling all of your settings and viewing footage.You don't need to spend money on a new security camera—an old smartphone will do as long as it can still connect to Wi-Fi. Just download a camera app (we like Alfred) to both your old phone and your new phone.Apps such as Alfred can turn old phones into makeshift security cameras you can check remotely from your current phone or from the web.Alfred is free to use and gives you a two-way live feed, motion detection with alerts, a two-way audio feed and use of both the front and rear cameras.If you're looking for the best security cam app to turn an old phone into a security asset, Alfred is your pick.
