Cummins RS20A 20kw Quiet Connect Generator is another member of the Quiet Connect series of generators offering your homes primary circuits and your neighborhoods noise restrictions. It is even strong enough to run a 5-ton A/C unit. The RS20A is also efficient with its automatic load management. This energy efficient unit offers you either Natural, or LP gas; you can choose one or the other when you purchase the unit. It is also carries CARB and EPA certifications. Exercise modes also make this model better as you can choose the specific times and dates that your generator will run, and save on power when you dont need it to run. A Crank only mode also means you save on power; your unit will crank the engine, but not power it up fully, so that it can run diagnostics. The Cummins RS20A is also resilient in the face of tough weather. This unit is cold capable device. The Cummins RS17a 17kw Quiet Connect Generator is well-worth consider for your home. CUMMINS RS20A is an exceptionally quiet generator, running at 65 dB(A) within 23 ft. (7 m) during normal load. The CUMMINS RS20A can run with either Natural or LP gas, through 12-inch fuel lines. This generator runs with clean power. With under 5% total harmonic distortion, it is safe for delicate devices and appliances. Remote monitoring makes this generator modern and efficient. You can see your units operation status and even run it remotely. All you need is your device and an internet connection. The RS20A is built to be strong and can handle extremely cold weather. I will run even in zero degrees Fahrenheit. I will run in temperatures even lower than that with the help of some additional accessories. The warranty for this unit is 5 years or 2000 hours, whichever comes first. You can get an extended warranty too. Exercise modes let you control your units operation even more. Set the dates and times at which your generator will run, and conserve power when you don't need it. A Crank only mode lets your generator run diagnostics by cranking the engine, but not starting it, thus saving energy. The CUMMINS RS20A has Intelligent Load Management. Your unit can handle 4 loads while continuing to monitor every load separately. Handling each load and only restoring the ones that the generator can handle helps conserve power.
