AutoCAD 2020 is a powerful computer-aided design (CAD) and drafting software, the world's leading 2D and 3D CAD application tools. This makes it very complex for beginners, although there is extensive documentation and a series of tutorials to get you started. AutoCAD 2020 enables you to create, visualize, document, and share your ideas like never before. The intuitive interface has been much improved in past years and now makes it much easier to identify the different functions available. Download and open AutoCAD on your computer. Click Sign in with your Autodesk ID. Log in with your Autodesk account information to activate AutoCAD. 1 Open AutoCAD on your computer. You'll find it in the Start menu (if you have Windows) or in the Applications folder (on macOS). If you have a subscription for AutoCAD, the app will activate automatically once you sign in with your Autodesk account.[1] If you're using a newer version of AutoCAD, you will see three log-in options: Sign in with your Autodesk ID Enter a serial number Use a network license The last two options under "Other license types" are no longer relevant with newer versions of AutoCAD. If you have a serial number, you can enter it, but it's for an older version of AutoCAD. 2 Click Sign in with your Autodesk ID. If you have older versions of AutoCAD, this will be different: for example, click Single-user if your version of AutoCAD is from 2019 and later, or click Sign-In for AutoCAD versions 2015-2018. A browser window will open if you aren't signed into Autodesk. Advertisement 3 Log in with your Autodesk account in your browser. Use the same username and password you used to pay for your subscription. Once you're signed in, your product will activate automatically.[2] Advertisement 1 Locate your serial number and product number. If you have a perpetual single-user license or any other type (including educational licenses) that comes with a serial number, use this method. If you don't already have your serial and product numbers accessible, you can find them by signing in to your Autodesk account at manage.autodesk.com and clicking the Management tab. 2 Open AutoCAD on your computer. You'll find it in the Start menu (if you have Windows) or in the Applications folder (on macOS). 3 Click Enter a serial number on the "Free Trial/" window. It's the blue link below the large square buttons (2019 and later) or the big square in the center (2018 and earlier). 4 Enter the serial number and product key and click Next. Once the information is accepted, you'll see a confirmation window. You can now use the full version of AutoCAD. Advertisement 1 Open AutoCAD on your computer. You'll find it in the Start menu (if you have Windows) or in the Applications folder (on macOS). If you've been using a free trial version of AutoCAD and want to purchase a subscription, use this method to do so. 2 Click Subscribe Now on the pop-up window. This opens the Autodesk store to a sign-in screen.[3] 3 Sign in with your Autodesk account. Use the same username and password you used to download your free trial version of AutoCAD. 4 Follow the on-screen instructions to process your payment. You will receive an email receipt once your payment is processed. 5 Return to AutoCAD. In most cases, processing your payment will activate AutoCAD immediately—give the app a try to make sure. If you're still being asked to subscribe, continue with this method. 6 Click the Sign In menu. It's at the top-right corner of the app. A menu will expand. 7 Click Manage License on the menu. This opens the License Manager. 8 Click Change license type next to AutoCAD. This should close and re-open AutoCAD and display the "Let's Get Started" screen. 9 Click Single-user (2019 and later) or Sign-In (2015-2018). The option you see varies by version. 10 Log in with your Autodesk account. Use the same username and password you used to pay for your subscription. Once you're signed in, your product is considered active. Advertisement 1 Make sure you need to activate offline. If you have single-user subscription, don't use this method to activate the product manually—you must activate AutoCAD online to confirm the subscription.[4] AutoCAD 2021 and newer does not support offline activation.[5] Only use this method in one of two situations: [6] You have a stand-alone education license (teacher or student), but don't have internet access. You have a perpetual license for a standalone Autodesk project from 2016 or earlier, and meet at least one of the following criteria: Do not have internet access. Have reinstalled or changed your operating system. Changed your request code. Got new hardware and are being asked to reactivate. Need to reactivate as part of a troubleshooting step. 2 Locate your serial number and product key. If you don't already have this information readily accessible, you can find it by signing in to your Autodesk account at [7] . Just click the Management tab once signed in. 3 Launch AutoCAD on your computer. You'll find it in your Windows Start menu or the Mac Applications folder. If the computer is connected to the internet, you must disconnect it first. Your computer cannot have an active internet connection while you use this method. 4 Click Activate on the "Free Trial/" window. This window will appear as long as the product is not currently activated. If you don't see this window and are just taken to AutoCAD, your product is active. If you're using an older version of AutoCAD (2014 and earlier), the menus and options described in this method may vary. 5 Enter your serial number and product key and click Next. 6 Select "Request an activation code using an offline method" and click Next. You'll see a "Request Code," which you'll need to write down. This code is generated based on the information you've entered. Click Close when you're finished writing down the request code. 7 Go to knowledge.autodesk.com/customer-service/download-install/activate/manual-activation-registration/activation-codes. Since this step requires an internet connection, you'll need to use a different computer (or phone or tablet). This brings you to the "Get an activation code" page. 8 Click the blue GET STARTED button. It's near the bottom-right corner of the page content. 9 Follow the on-screen instructions to receive your activation code. You'll have to provide your contact info, serial number, and the request code you generated earlier. Once the information is accepted, write down the activation code that appears on the screen. 10 Return to AutoCAD and click Activate. It'll be on the Free Trial screen. 11 Enter your serial number and product key and click Next. 12 Select I have an activation code from Autodesk and click Next. 13 Follow the on-screen instructions to enter your activation code. Once the code is accepted, you can use the full version of AutoCAD online or offline. This comprehensive guide provides everything you need to know about AutoCAD licensing – from acquiring a license, understanding the roles of Serial Numbers and Product Keys, and activating your software, to troubleshooting common issues. By the end of this article, you'll be well-equipped to handle your AutoCAD licensing confidently and efficiently.Key TakeawaysAutoCAD licenses are of different types: single-user, multi-user, and educational. Choose what suits your needs.Serial Numbers and Product Keys are vital for installation and activation. They can be found in your Autodesk Account after purchase.License activation involves entering your Serial Number and Product Key within the AutoCAD software.Managing your license effectively involves transferring it between computers when needed and adhering strictly to Autodesk's licensing policies.Troubleshooting license issues may require checking your network, re-entering license details, or contacting Autodesk Support.What is a License?A license in AutoCAD is a legally binding agreement that allows you to use the software. The terms of the agreement stipulate the ways in which the software can be used, the duration of use, and the rights you have as a user. There are different types of licenses available for AutoCAD: Single-user license: This license is for an individual who installs and uses the software on a single computer. It cannot be shared with other users. Multi-user license: This type of license allows the software to be installed on a network. Any computer connected to the network can access and use the software. The number of concurrent users is determined by the number of seats purchased. Educational license: This is a free license offered to students, teachers, and educational institutions. It provides full access to the software but cannot be used for commercial purposes. AutoCAD Serial Number and Product KeyThe AutoCAD Serial Number and Product Key are two critical components you will need when installing and activating your software. AutoCAD Serial NumberA Serial Number is a unique identifier provided by Autodesk when you purchase a license. It verifies the originality of the software and helps Autodesk track software and maintain customer service records. The Serial Number is often required during the installation and activation process. It is usually in a format like XXX-XXXXXXX.AutoCAD Product KeyThe Product Key, on the other hand, is a code that specifies the type of software you have purchased. For example, the Product Key for AutoCAD 2020 is 001L1. Product Keys help Autodesk ensure that you are installing the correct software that matches your purchase.Acquiring an AutoCAD LicenseFollow these steps to acquire an AutoCAD license:Purchase the license: You can purchase an AutoCAD license directly from Autodesk or authorized resellers. Depending on your needs, you can choose a monthly, yearly, or three-year plan.Register and create an account: After purchasing, you need to create an account on Autodesk's website if you haven't done so already.Find your Serial Number and Product Key: After registration, you can find your Serial Number and Product Key in the Autodesk Account. It's under the 'Management' section, then 'Products & Services', and then 'Product Keys & Serial Numbers'.Download and install the software: From your Autodesk Account, go to 'Products & Services', then 'Product Updates' to download the AutoCAD software. During installation, you will be prompted to enter the Serial Number and Product Key.How to Activate AutoCADOnce you've installed AutoCAD, you'll need to activate it to verify your licensing information and unlock full access to the software. Here's how to activate your AutoCAD license:Open AutoCAD: Start the software. A window will open prompting you for your Autodesk Account information. Enter your email address and password, then click 'Next'.Enter the Serial Number and Product Key: You will be prompted to enter your Serial Number and Product Key. Fill in the relevant information, then click 'Next'.Confirm and complete activation: Review your information. If all details are correct, click 'Activate'. You should receive a message confirming successful activation.Troubleshooting AutoCAD Licensing IssuesDespite following all the correct procedures, you may sometimes encounter issues with your AutoCAD license. Here are some common problems and solutions: "The license manager is not functioning or is improperly installed": Try restarting your computer or reinstalling AutoCAD. If the problem persists, you may need to reinstall the Autodesk License Service. "The software license check out failed": This error typically occurs with a multi-user license. Check to ensure your network is running correctly and the license server is available. If the problem persists, you might need to update the Network License Manager. Remember, if you're unable to resolve your licensing issue, you can always reach out to Autodesk Support for further assistance.In conclusion, understanding how AutoCAD licensing works is vital for a seamless experience with the software. From purchasing a license to activation and troubleshooting, this guide provides a comprehensive overview to help you navigate the process. AutoCAD License Transfer and ManagementJust as important as activating your AutoCAD license, it's crucial to understand how to manage it, including how to transfer licenses between computers. Transferring AutoCAD LicenseTransferring a license is necessary when you get a new computer or need to move your AutoCAD license to another machine for other reasons. Here's a step-by-step guide on how to do that:Export your license from the old machine: On the old computer, open AutoCAD, click on 'Help' and then on 'About'. Choose 'Manage License', then select 'Export'. Save the license file in a location you can easily access.Import your license to the new machine: On the new computer, install AutoCAD. Open the program, click on 'Help' then 'About', choose 'Manage License', and select 'Import'. Navigate to the license file you exported and select it. Remember, transferring licenses should be done within the bounds of the Autodesk Software License Agreement.Managing AutoCAD LicenseEffective license management is key to getting the best value out of your AutoCAD software. Here are some best practices for managing your AutoCAD license:Track your usage: If you are using a multi-user license, monitor usage trends to ensure you have the appropriate number of licenses for your team.Stay updated: Regularly check for software updates to ensure you have the latest features and security patches. You can do this in the Autodesk Account under 'Product Updates'.Regular backups: Export and back up your license regularly, especially before making significant changes to your computer system.Staying Compliant with AutoCAD LicensingIt's vital to stay compliant with Autodesk's licensing policies to avoid legal issues and software access problems. Here are a few guidelines to ensure you remain compliant:Do not share licenses: Single-user licenses are assigned to an individual and should not be shared with others.Only use legitimate software: Avoid cracked versions of AutoCAD. Using unauthorized software is illegal and can also expose your system to security risks.Renew your license promptly: Keep track of your renewal dates and make sure to renew your licenses on time to avoid interruptions to your work.By understanding the ins and outs of AutoCAD licensing, you'll be better prepared to tackle any licensing issue that arises. From purchasing and activating to troubleshooting and staying compliant, managing your AutoCAD license is a vital part of using the software effectively and efficiently.Frequently Asked Questions (FAQ)1. What can I do if I lost my AutoCAD Serial Number or Product Key?If you've lost your Serial Number or Product Key, don't panic. You can retrieve them by logging into your Autodesk Account. They can be found under the 'Management' section, then 'Products & Services', and then 'Product Keys & Serial Numbers'.2. Why is my AutoCAD license showing as "Expired" even though I have renewed it?Sometimes, a system glitch may not reflect a license's renewal status. Try restarting your software or computer. If the issue persists, you may need to update your license details (Serial Number and Product Key). If all else fails, contact Autodesk Support for assistance.3. Can I use my AutoCAD license on multiple computers?Yes, but not simultaneously. A single-user license can be installed on up to three machines (work computer, home computer, and portable), but can only be active on one at a time. For simultaneous usage, you'll need to purchase additional licenses or consider a multi-user license.4. How can I switch my AutoCAD license type from single-user to multi-user or vice versa?To switch your license type, you need to contact Autodesk or your Autodesk reseller to discuss changing your subscription. Remember, you'll also need to update your software with the new Serial Number and Product Key after the switch.5. Can I extend my trial period for AutoCAD?No, the trial period for AutoCAD cannot be extended. Once the trial period has ended, you must purchase a license to continue using the software.6. Can I deactivate my AutoCAD license on one computer and reactivate it on another?Yes, you can do this using the License Transfer Utility tool available in the software. Please remember to comply with the Autodesk Software License Agreement when transferring licenses.7. What should I do if I receive an error message during AutoCAD activation?The first step is to ensure that you have entered the Serial Number and Product Key correctly. If the issue persists, try disabling your firewall or antivirus software temporarily. Sometimes, these programs can interfere with the activation process. If you still can't resolve the issue, contact Autodesk Support for help.8. How do I reactivate my AutoCAD license after a hardware change?Hardware changes may prompt Autodesk to require a new activation. To reactivate, simply enter your Serial Number and Product Key as you did during the original activation process. If you face any issues, reach out to Autodesk Support.9. Can I transfer my AutoCAD license to another person?If you want to transfer your license to another person, you must first uninstall the software from your system. The new user can then install it on their computer using the same Serial Number and Product Key. Remember to respect Autodesk's licensing agreement during this process.10. What should I do if my AutoCAD software enables you to create, visualize, document, and share your ideas like never before. The intuitive interface has been much improved in past years and now makes it much easier to identify the different functions available. With the newest release of Autodesk products, we bring you a new list of AutoCAD 2020 product keys. Product keys are required for installation of Autodesk products and are used to differentiate products that are both sold independently and as part of a product suite. For example, installing AutoCAD 2020 as a point product requires product key 001L1, but installing AutoCAD 2020 from the AutoCAD Design Suite Premium 2020 requires product key 768L1. The same version of AutoCAD is in both software packages but the product key differentiates one package from the other. Note: Please ensure you are using the correct product key for the Autodesk product and version you are installing. Entering an incorrect product key will result in activation errors for that product. Your Serial Number and Product Key are displayed in your Autodesk Account in the product tray on the Products & Services page and also again in the Software Download window. Note about serial number visibility in Autodesk Account: Only account administrators, such as Contract Managers and Software Coordinators, and Named Users with assigned software benefits will see serial numbers in Autodesk Account. You are the account administrator if you purchased a software subscription using your Autodesk Account or were assigned the role of Contract Manager or Software Coordinator by your company. If you do not see the software you wish to activate in your Autodesk account or see the message "Contact your admin for serial numbers", you need to contact the contract administrator. Only an administrator can assign you as a Named User or End User and give you permission to download and activate the software. If for whatever reason, you cannot locate your product key, there is another method. Here is an easy step-by-step way to get your product keys: Using your installation media, (USB key, DVD, download folder, etc.) navigate to the location of the setup.exe file for your Autodesk product. In that folder, look for a file named MID.txt, MID01.txt, MID02.txt, or some variation on that name. Open this file in notepad and verify that the product name is what you expected it to be. The first five characters of the part number should also be the product key for that product. For example: MID: Autodesk_Design_Suite_Ultimate_2012_64bit_SWL_ENU_C009_EXE1 Product Name: Autodesk_Design_Suite_Ultimate_2012_Platform: Windows_XP/Vista/Win7 Media: ESD Part Number: 769D1-05Y001-P503E, 769D1-05Y001-P504E If you need further assistance, email us at support@microsolresources.com.
