Architecture Diagram - Conceptual Level
An example Enterprise Architecture as set of coherent concepts

Dragon1 Architecture Visualization
Using RoboHelp (2017 release)

Adobe

May 2, 2017
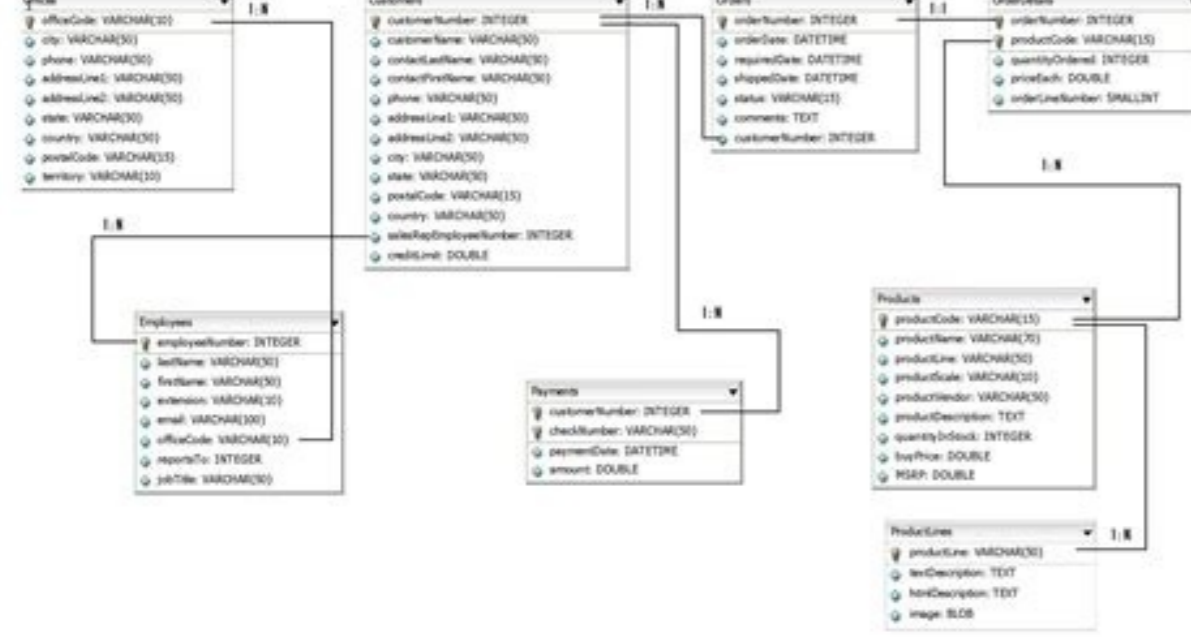

Admin: Enters the name, Father's Name, Registration Number 2-4a, 4. Alternative Flows 2-2a: if the Password is incorrect than a message is printed on the screen and Administrator is returned to the Books record menu. 31. Fun ways to visualize your data by using our interactive data widgets. If the required book is not available in the library, a message is printed on the screen student. Pre-Conditions None Post-Condition Admin selects View Student Record option from the Student Membership Record menu. 7. 4 3.2 Use case diagram .... Software Requirements Specification for Library Management System Page 8 Use Case Name Edit Students Record Scope Online Library Management System Level User Goal Primary Actor Admin Stakeholders and Admin: wants to change membership record of the specific student. Pre-Conditions None Post-Condition Admin selects View Student Record option from the Student Membership Record menu. 7. 4 3.2 Use case diagram .... Software Requirements Specification for Library Management System Page 26 5.3 Operational Contracts Contract co1: Register Online Operation: register (sign-up) Cross reference: use cases: online registration Pre condition: student visit the website post Condition: -student filled the form by providing required information -she/he provide the correct information -she/he got registered Contract co2: Book Record Operation: Add book record (name, author, edition) Cross reference: uses cases: add book record Pre condition: none. Elaboration Phase 5.1 Domain Model Copyright © 2012 by Maryum Afzal. 2-2b: if the name of the categories not among the existing categories, a message is printed on the screen and admin is returned to Student Membership record menu. Software Requirements Specification for Library Management System Page 13 Use-Case Name View Students Record Scope Library Management System Level User Goal Goal in Context Present the record of all students in tabular form. Logical Architecture ....27 6.1 Description of Architecture of System ......-Record successfully added. Faculty Member: wants to reserve book Administrator: responsible for the management of online activities and modifications in the database. Software Requirements Specification for Library Management System Page 21 Copyright © 2012 by Maryum Afzal. Design, publish and share your beautiful flipbooks with our advanced flipbook maker online. Risk Analysis is also done and security measures are taken to avoid unauthorized access. Variation Open Issues Student cannot search his/her own record Copyright © 2012 by Maryum Afzal. 21. 12. 1 1.3 Intended Audience and Reading Suggestions .... Technology and Data Administrator can use books barcode to enter the records of books. Open Issues Administrator must logout to avoid unauthorized access. 2-2c: The Registration must be in the form "year of joining of institution – institution name – department name – registration number (that must not be greater than 4 digits)". These dimensions can be easily changed and the length adjusted with a slider.Customizable:This template can be fully customized. 3 3. He/she tries to sign-up. 17 4.3 Performance .... Few of our most popular diagram types: Flowchart Class Diagram Genogram ArchiMate Floor Plan and more... Post-Conditions The record of the Books is added to the Library Management Software and it assigns a number to each book. 18. 27 6.3 Application Layer .... Primary Actor Admin Stakeholders and Admin: Wants to enter and maintain the returned Books Record. 26 6. 13. Working seamlessly together Businesses, individuals, and governments use VP Forms to build and collect their forms, their way and it's Free forever. Primary Actor Admin Stakeholders Admin: Wants to Search membership record of the Required Students Preconditions None Triggers Admin selects Search Student Record option from the Student Membership Record menu. 15. 33 Appendix A: Glossary ....34 Appendix B: Analysis Models ....34 Appendix C: To Be Determined List ....34 Copyright © 2012 by Maryum Afzal. The minimum server's hardware requirements should meet the following standards: OS: Windows Processor: Pentium 4.0 GHz or higher RAM: 1GB Mb or more Hard Drive: 80 GB or more Copyright © 2012 by Maryum Afzal. Student have to go to library within 24 hours to get the book, otherwise reservation will be cancelled. 1 1.4 Product Scope .... Software Requirements Specification for Library Management System Page 17 4. Post Condition: -A book record instance B was created. Working together seamlessly. -Result had been displayed. You can edit your data through the sheet editor or simply modify the values here. Special Requirements The maximum response time is 1 minute. -Student entered the system ID. In order to create an efficient and effective library management system in the premises of University of Education. We have a collection of infographic components which allows you to instantly add or subtract content blocks on the fly. 27. Design Phase ....29 7.1 Sequence Diagram .... Special Requirements The maximum response time for online book search is 2 minutes. 4. Or select from our wide collection of pre-processed photos to create an unique presentation. Collect data. Software Requirements Specification for Library Management System Page 32 Copyright © 2012 by Maryum Afzal. This system is exactly desirable because it is cost effective. We can update it to next version supporting latest mobile technology. Admin: Enters the Name of the Categories and the correct data of that student 2-2c, 2-2d 3. Success Guarantee Library Management Software Presents the record of the required student in tabular form. Surely you will be able find one to fit your style and topic. 37. Highlight and Key Features Design, customize and create your own flipbook Convert PDF, PPTX, EBooks to digital flipbook Create, decorate and organize your own bookshelf Share via URL, social media platforms or embed into websites Learn More Professional collaborative online drawing tool. Pre-Condition Student and Faculty members are registered Post-Condition Student/Faculty Member has reserved the book Main Success Scenario 5. To enter in the option Add issued books Record and Edit issued books Record, the system waits for the Password. If book search is unsuccessful, then that book cannot be viewed or edited. Record is found. 11. Sample screens and form has been displayed above Copyright © 2012 by Maryum Afzal. 5. Login successful. Student clicked the reservation button. 2-2b. 20. Software Requirements Specification for Library Management System Page 18 All methods are easily understandable as other than the creator of the method can also understand the code. Technology Student or faculty member may not be able to navigate on site. To enter in the option Add returned Books record and Edit returned books Record, the system waits for the Password. Student/Faculty member library card will be taken. Add returned Book Record b. You can edit content, change image(s), apply custom colors, input your own fonts and logo, and more.Formats:Download as a high resolution JPEG, PNG, PDF or HTML5, embed into a blog post or webpage, or generate a shareable link for online use.Compatibility 1. Feel free to use them as you please. Etc. Librarian or the administrator tries to search record for a particular book. 7 4. 4.4 Supportability This system supports extensibility. Current requirement of a global village doesn't support traditional work thus we have developed database based LMS with web based interface. 6. 2-2d: The Date of the Birth and Joining date must be in the format of "MM/DD/YYYY" if Month is greater than 12 or Days is greater than 31, a message is printed on the screen and asks for reenter. 1 1.5 References .... 34. 19 5.2 System Sequence Diagram .... Software Requirements Specification for Library Management System Page 16 Use Case Selection Description Use Case Name Return Book Level User-goal level Primary Actor Student, Faculty Member Stakeholders and Interest Student: wants to return a book in library Faculty Member: wants to return the book. 9. Learn More Spreadsheet-based software for collaborative project and information management. She/he submits the fine to get the library card back. Librarian will forward this complaint to the administrator. 4.3 Performance The response time in case of online search will be 1 minute (maximum). 32. Software Requirements Specification for Library Management System Page 4 3. Functional/Behavioral requirement 3.1 Actor Goal List Copyright © 2012 by Maryum Afzal. 5. Student enters login information and sign in. 19. Wide selection of over two thousand templates to fit your theme, topic, mood and various occasions. Librarian: responsible to keep the specific records for particular student and faculty member. Primary Actor Admin Stakeholders Admin: Wants to view membership record of all Students that are member of the library. Overall Description .... 1 2.1 Product Perspective .... 28 7. Library Management System: presents a form 3. Software Requirements Specification for Library Management System Page 29 7. Software Requirements Specification for Library Management System Page 34 Appendix A: Glossary Appendix B: Analysis Models Appendix C: To Be Determined List Copyright © 2012 by Maryum Afzal. -Book status had been updated. 19 5. Student wills logout from the library management system. Spice up your design with these amazing graphics. Software Requirements Specification for Library Management System Page 2 2.2 Product Functions Members Listing and Searching Items Management (Books, Magazines, Articles, News, Thesis, Projects, DVDs, etc.) Circulation Management(Issue of Books, Return of Books and Re-Issue) Importing Members from Existing Database Labeling (Barcode Tag Generation) Book Reservation Copyright © 2012 by Maryum Afzal. Student Graphical Interface Student has a single interface only. It will save the time of both librarian and students, if a student need a particular book he will go to library and asked from the librarian about the availability of the book than librarians check the availability of book on her/his personal computer and then tell the student about the book. Current requirement of a global village doesn't support traditional work thus we have developed database based LMS with web based interface. -It was associated with database. InfoART online editor is more than just a visual presentation creator. In general libraries of the city/country. Logical Architecture 6.1 Description of Architecture of System In this following figure is elaborating the concept of 3 tier architecture for library management system 6.2 User Interface In this layer we will elaborate the interface for end user. Elaboration Phase .... .19 5.1 Domain Model Description of Architecture of System .... 25. Software Requirements Specification for Library Management System Page 24 Copyright © 2012 by Maryum Afzal. Convenient productivity tools for everyone. 18 4.6 Legal .... Introduction .... 1 1.1 Purpose .... Software Requirements Specification for Library Management System Page 1 1. All the programming is done at this layer. Interests Pre-Conditions None Post-Conditions Admin selects returned Book Record option from the main menu and Library Management System waits for user input Main Success Scenario 1. Triggers Admin selects Edit Student Record option from the Student Membership Record menu. Administrator enters the name, Author's Name and Edition or he/she can use barcode. That contains the following two options to choose from.2-2a a . Fine will be paid according to the laws of the institute/organization. Librarian/ administrator tries to login. For librarian and Administrator management will be quick and simpler than many other library systems. Software Requirements Specification for Library Management System Page 19 4.6 Legal All the rules and regulations of the institute's library will be followed like book reservation hours, fine charges, how many days a member can keep the book? Special Requirements Printed fine slips must be generated Technology and Data Variation Fine slip will be generated from the dot-matrix or ink-jet printers. You can also import your data from Google Sheet. Software Requirements Specification for Library Management System Page 20 5.2 System Sequence Diagram Copyright © 2012 by Maryum Afzal. Alternative Flows 2-2a. 1 2.2 Product Functions .... We are your one stop shop solution to diagram creations. Design, create, convert and share with our all in one flipbook maker. 6.4 Data Link Layer This layer contains data that is to be created, maintained and accessed by the admin. 4.5 Implementation On front end the technology we are using is: Servlets, HTML, CSS and Java Script while the backend technology includes My SQL Server. 10. Librarian checks if the book is not returned on time. Get feedbacks. An amazing flipbook maker where you can create existing files into flipbooks at ease. In case of faculty member fine will be deducted from pay. Student/Faculty member gives his/her library card and the book(s) to the librarian. 1.4 Product Scope The Library Management System will be a web based application design & develop for receipt and issuance of books in the library along with the borrower's details and history. Student/Faculty member sign-up to get registered online. Most common supported charts includes: Bar, line, area, pie, doughnut, radar, and rose charts. Administrator Graphical Interface In 1st administrator interface administrator or librarian can insert the record of books there will be 6 fields Books category Books name Books author name Books specific id Books edition Book code (optional) and hn 2 administrator interface administrator can insert the record of student to which he/she allocate the book, in this interface following will be the fields. Frequency of Occurrence Could be nearly continuous Open Issues If the site is down, records will be entered through system instead of web. 9. It is extendable in many ways like avoiding traversing multiple links or methods and different sorting techniques, etc. 28. Software Requirements Specification for Library Management System Page 30 Copyright © 2012 by Maryum Afzal. Alternative Flow 2-2a: if the Password is incorrect than a message is printed on the screen and admin is returned to the Student Membership record menu. He/she wants to edit the record. 4.2 Reliability Its cost is under the budget and it is desirable to aim for a system with a minimum cost subject to the condition that it must satisfy the entire requirement. 24. 33 7.3 Design Class Diagram .... Software Requirements Specification for Library Management System Page 10 Use Case Selection Description Use Case Name View/Edit Book Detail Level User-goal level Primary Actor Librarian, Administrator Stakeholders and Interest Administrator: responsible for the management of online activities and modifications in the database. Software Requirements Specification for Library Management System Page iii Revision History Name Date Reason For Changes Version Ammar Azeem 1st To meet current requirement and in order to Final Maryum Afzal December create efficient system Muhammad Bilal 2012 Maham Batool Copyright © 2012 by Maryum Afzal. 29. Scenario 2. Insert different charts into your presentation by dragging and dropping it onto the canvas. Librarian: responsible to update the status of books. The system will generate the spine labels and manages the late fine and damages on lost books as well. Customized data will be used in this application. Admin: Selects the menu to Change membership record of the Specific Student. Permission is granted to use, modify, and distribute this document. Customize your photos with our built in filters. Ready to use isometric graphic resources. Software Requirements Specification for Library Management System Page 14 Use-Case Name Returned Books Record Scope Library Management System Level User Goal Goal in Context Present a menu from which one can access the various functions of the returned Book Record. Open Issues If the site is down, records will be entered through computer system instead of web. Primary Actor Administrator Stakeholders Administrator: enter and maintain the issued Books Record. Software Requirements Specification for Library Management System Page ii Table of Contents Table of Contents .... and modifications in the database. Pre-Conditions Books records are already found in the database. 3. Brainstorm and design remotely and collaboratively in real-time. Interests Student/faculty member: whose record will be manipulated. 22. 23. Student has to pay it with semester/session fee. Edit returned Books Record 3. Student searches for specific book. (2-2a, 2-2b) That contains the following Two options to choose from: a) Add issued Books Record b) Edit issued Books Record Alternative Flows: 2-2a. Student/Faculty member sign-up to get registered online. Most common supported charts includes: Bar, line, area, pie, doughnut, radar, and rose charts. Administrator Graphical Interface In 1st administrator interface administrator or librarian can insert the record of books there will be 6 fields Books category Books name Books author name Books specific id Books edition Book code (optional) and hn 2 administrator interface administrator can insert the record of student to which he/she allocate the book, in this interface following will be the fields. Frequency of Occurrence Could be nearly continuous Open Issues If student/faculty member is not registered he will have to wait for one day to process his/her complaint to the administrator. Software Requirements Specification for Library Management System Page 11 Use-Case Selection Description Use Case Name Add Books Record Scope Library Management System Level User-Goal Level Goal in Context Present a form to the administrator to allow him to add record of the Books. Create, publish and manage all your visual content in a unified platform. Administrator selects the menu option to enter in the Issued Books record. Main Success 1. Variation Open Issues If the site is down, records can be viewed through computer system instead of web. He/she provides correct information and a secret password. Interfaces: Graphical interfaces will be used 2.3 User Interfaces In this application. Interfaces will be used. He/she fails and receives an error. Alternative Flow 2-2a: if the Password is incorrect than a message is printed on the screen and admin is returned to the Student Membership record menu. Variation Open Issues If the site is down, only be reserved for 24 hours. We can use it in two ways: 1. Software Requirements Specification for Library Management System Page 23 Copyright © 2012 by Maryum Afzal. ii Revision History .... Software Requirements Specification for Library Management System Page 22 Copyright © 2012 by Maryum Afzal. 4. Add text, filters, stickers and more. Software Requirements Specification for Library Management System Page 12 Use Case Selection Description Use Case Name Update Issued Books Record Scope Library Management System Level User Goal Level Goal in Context Present a menu from which one can access the various functions of the issued Book Record. 2-2a Alternative Flows 2-2a. Technology and Data Variation Student or faculty member may not be able to navigate on site. Library Management System: Presents a Menu for maintaining returned Books Record. Contract co4: Add Member Operation: add member record() Cross reference: use cases: member record add Pre condition: -student enters login information. Primary Actor Administrator Stakeholders Administrator: Wants to add record of the different Books Pre-Conditions The password entered is correct. Student/Faculty member visits the website to register on online library services. As it is reusable software thus it will require less design, coding and testing cost even the amount of code also simplifies understanding, which increases the likelihood that code is correct. Pre-Conditions Main Success Scenario: 1. LMS presents a Menu for maintaining issued Books Record. The record has been edited. 33. Book has been reserved on the basis of unique library ID number. Or edit it through our built in spreadsheet. Student Enter login information and sign in. -Adding record was successful. 2. 6. Over 2000+ easy to use professional quality diagram templates that are ready to be used for your next project. 30. Create stunning photo collages. Clearly identifying the information needed by the user, the source of the information and outputs expected from the system. It is desirable to aim for a system with a minimum cost subject to the condition that it must satisfy the entire requirement. You can use these components on various presentations such as infographic, brochure, menus, posters, flyers, and more. 17 4.4 Supportability .... Copyright © 2012 by Maryum Afzal. Administrator will update online book status. System testing is properly done to avoid bugs and unexpected errors. Alternative Flows 1. Pre-Condition Student and Faculty members have submitted their registration form. Records of the members could not be displayed, but an error. Software Requirements Specification for Library Management System Page 6 3.2 Use case diagram Copyright © 2012 by Maryum Afzal. 2. 14. 11. Software Requirements Specification for Library Management System Page 27 Contract co3: Search Book online Operation: search book online() Cross reference: use cases: online book searching Pre-Condition: Student/faculty member visits the website. Pre-Condition Book(s) have been issued to the student/faculty member Post-Condition Student/faculty member has reserved the book Main Success Scenario 1. Post Condition: -Student had entered the name. Contract co3: Reserve Book Online Operation: reservation (st_library_ID) Cross reference: uses cases: online book reservation Pre-condition: student visit the website Post Condition: -Student found the book. Librarian: responsible to keep the specific records for particular books. Reuse of previously written code on new projects Copyright © 2012 by Maryum Afzal. Learn More Library Management System - State Diagram Template Specifications:Dimensions: All infographic templates are 800 pixels wide with varying lengths. Librarian generates fine slip. Proper backups system will not allow the online system to be down. Frequency of Occurrence Could be nearly continuous Open Issues If the student/faculty member will not pay the fine in one week duration, the fine will not be given. Copyright © 2012 by Maryum Afzal. 1 1.2 Document Conventions .... Alternative Flows 6. Software Requirements Specification for Library Management System Page 7 3.3 Use-Case Description Use Case Name Add Students Record Level Sub-Function level Primary Actor Student, Faculty Stakeholders and Interest Student: wants to register in the library. 16. Quickly change the values by dragging the control handler. Preconditions The password entered is correct. Success Guarantee Library Management Software shows the table that contains the record of all students that are member of the library. 6.3 3.3 Use-Case Description .... Student could not find the required book. 1.5 References .... She/he got registered. Student enters the system ID. 7. Post-Condition Record for a student/faculty member has been added. 3. 12. 17 4.2 Reliability .... Software Requirements Specification for Library Management System Prepared by Maryum Afzal Ammar Azeem Muhammad Bilal Maham Batool University of Education 17th December 2012 Copyright © 2012 by Maryum Afzal. 36. Classes, functions and formulas are written here. Student visits the website to access the online library services. 8. Success Guarantee The record of the student Membership is Changed in the Library Management Software. 1.2 Document Conventions Standard rules of document convention and agile manifesto has been followed in order to standardize the work. Post-Condition Record for a particular book has been searched or modified. 2-2a 2. 26. This system is reusable. Variation Frequency of Occurrence Could be nearly continuous Open Issues If the site is down, records can be viewed through computer system instead of web. Nonfunctional Requirements .... 17 4.1 Usability control handler. 20 5.3 Operational Contracts .... Functional/Behavioral requirement .... 4 3.1 Actor Goal List .... 10. She/he will visit the librarian to report a complaint. They are unique and easy to use. Nonfunctional Requirements 4.1 Usability In educational institute that can make their library management system IT based and reliable. Ability to edit data by dragging the record of the different Books. Session (student in rolled year) Department (biology, BSIT etc) Semester Shift (morning, afternoon, evening) Roll no Student Name Book id Operations: It will support all the basic requirements of students, faculty members. You can even change the color of the elements. Software Requirements Specification for Library Management System Page 31 Copyright © 2012 by Maryum Afzal. If login fails, the administrator should re-register that staff 2. All the data is kept and arranged in a separate database which can be placed on a remote machine. Software Requirements Specification for Library Management System Page 5 ACTOR GOAL NUMBER Student Book reservation Return book Search books online Change password Read and Download E-Books Librarian Add member Delete member Add new book information Delete old book records Send e-mail reminders Fine collection Update student information Issue book Search student and faculty records Update book status Issued Books Records Database Administrator Online registration Issue online user id and password View all records Search student and faculty records Maintenance Update Student Information Online Delete Book Update book status online Issued books Records Upload E-Books Faculty Members Book reservation return book online book online book reservation search books online add student notes Copyright © 2012 by Maryum Afzal. Special Requirements The maximum response time for online registration is 1 minute. Use case Name Search Student Record Scope Library Management System Level User Goal Copyright © 2012 by Maryum Afzal. Sharing of newly written code within a project 2. Database is properly normalized. Design Phase 7.1 Sequence Diagram Copyright © 2012 by Maryum Afzal. Software Requirements Specification for Library Management System Page 15 Use Case Selection Description Use Case Name Reserve Book Level User-goal level Primary Actor Student, Faculty Member Stakeholders and Interest Student: wants to reserve a book online. 29 7.2 Collaboration Diagram .... 35. We can also help you get started with our wide collection of chart templates. Technology and Data Librarian member may not be able to navigate on site. -Student found the required book. The Record of the books, updating of the previous record and assign a number to each book has been done.
