# Hvac electrical troubleshooting chart

How to test an hvac contactor. How to troubleshoot contactor hvac. How to troubleshoot hvac.

Diagrams for download and the measurement layout are available at the bottom of this page .ENStrucers are always looking for a low-cost project, hands-on, which More safe to teach your students on the Electric HVAC, Components, Thermostats, Thermostat Fiance, and an Introduction for Solution of Electric Problems ! This small electronic training board can be built for each student and allows each student to get some practical training. The teacher can provide step by step instruction and after the project is built, the teacher can set failures for the board for the student to find using his multermomer. The key is to ensure that failures are not visible and to make students meet each problem using the multermometer. The student should not extract any connections to try to encounter the problem, but only find the problem (s) using the multi-meter and explain the problem for the teacher (to prove they understand) before fixing- Lo. This Electric Formation Council is designed to assist in the instructions and fundamentals of the following: - Intermodeling fiação -Thermostat - Electric components - Electric- ELECTION FIRECTION - ELECTION ELECTION -READING FIAÇÃO DIAGRAMS - Surstro for Electric Solutions The Electric Framework Replies The Thermostat Functions of a Thermostat Air conditioning air furnace. Instead of using a control board, this card uses Electric Relations and switches to perform tasks. The metallic plate base serves as an electric ground frame and GFCI is the protective device for the training plate. As the teacher moves through training, the student can add additional components to this plate to increase the difficulty, as extra timing mechanisms. "I want to say a special thanks to Packard and Diversitech for its incentive in the creation of this Electric Formation Council and the associated fiação diagrams to benefit the instructions HVAC.Packard Electric Components Used: PR380 - Vaneiro Relay SPNC, SPNO 24V COILPOP3 LI 'L POPPER - 24V Circuit Breaker 3 AMPS24A343- NOPR340 Heat Sequencer - Relation Commuter General Cutting DPDT 24V COILC130A - Single Pole Contactor, 24 Volt, 30 AMPPF42440 - Multi-Tap Transformer 120, 208, 240V Primary, 24V SecondaryTD102 "Delay-On-Faça Timer" Diversitech Tools Used: FTIL3 "Alligator LeadsMag- 1 "Jumpers ãñã" All other supplies Used: (1) 1/2 "PLIWOOD Board that is 18" in 18 "" (1 piece) 26 Caliber Sheet 8 "for 18" or Greater (10 120V 15PP GFCi Plug with Cable (1) 120V 15PL Plug with Corda (Misc) 16-22 Gauge Female Spade Crimping Connectors (Misc) 16-22 Gauge Piggy Back Female Spade Crimping Connectors (1) 2 "x 4" x 2 1 / 4 "Cai KA Metal Electron with 1/2 "Nocaute (2) 3.5" by 3.5 "by 1.5" metal ceiling light box with 1/2 "Nocutas (1) 120V Power Fan Motor (you can meet them for free in any old microwave), otherwise use this fascus engine: C-Frame engine, 1/150 HP, 115 volts, 3000 rpm, Number of K670 pieces ( 2) small blue yarn nuts (15) 1/4 "plastic braces (1) 3/8" Cable Strap (8 Panels) 14 Gauge Thhn Black Stranded Wire (8 Panels) 14 Gauge Thhn white stranded wire (8 ) 18-6 thermostat thermostat (1) Duplex receptacle (2) Ceiling light sockets (2) Lamps 120V, a red, a blue (1') 14-2 nmb romex (1) Honeywell Pro 3000 Thermostat (Misc) 1/4 "by 1/2" Zip Screws (2) Plastic Sleeves for Electric Box Nocutas (1) NMB 1/2 "Metal Box Connector for ELECTION BOX NOCAUTE (1) Terminal block for thermostat wires with at least 6 terminal sets, more terminals allows you to add used laterers.Tools: (1) MULTER Digital Metro (1) Wireless Drill (1) 1/4 "Magnetic Nut Driver (1) 6in1 Screwdriver (1) Wire Stripper / Crimper Å ¢ €
