You can browse the web on your iPhone or iPad with Chrome. On your iPhone or iPad, open App Store. In the search bar, enter Chrome. Tap Get. To install, follow the on-screen instructions. If prompted, enter your Apple ID password. To start browsing, tap Open. To open Chrome from your Home screen, tap Chrome . Post to the help community Get answers from community members Apps are designed for use with supported Android and Chromebook devices and can't be used on Windows or Mac computers. On your device, open the Google Play Store or go to play.google.com on a web browser. Search or browse for content. Select an item. Select Install or the item's price. Follow the on-screen instructions to complete the transaction and get the content. If you made a purchase before: Select your payment method with the Down arrow . If it's your first purchase: Your payment method will be added to your Google Account. Tip: To change your display language on Google Play, change the language in your Google Account settings. Find apps for your watch, tablet, TV, car, or other device You can use Play store filters to search or browse apps and games that are compatible with each of your devices. On your phone: Open the Google Play app . At the top, search for an app or content. In the dropdown menu, choose a device associated with your account. On your computer: Go to play.google.com. At the top right, click the magnifying glass . Then, search for an app or content. Select the device dropdown and choose a device associated with your account. After you follow these steps, in your search results, you'll find the apps that are compatible with your device. Tip: To use the search filter, you must be signed in to an account associated with multiple Android devices. Apps and digital content are connected to your Google Account, not just your device. You don't have to buy them again if you get a new device. You can use them on multiple devices. Learn how to install apps and content from your phone or computer to other devices. Content can't be transferred between accounts If you own multiple accounts, you can't transfer content between accounts on Google Play. If you have multiple accounts on your device, before you complete your purchase, make sure you're signed in to the account you want to use. If you purchased an app on the wrong account, contact the app developer. They may give you a refund for your purchase. Post to the help community Get answers from community members Next: Buy & use a Play gift cardYou can install apps, games, and digital content on your device from the Google Play Store. Some content is available at no charge, and some you need to buy. You can use apps that you bought on Google Play on any Android device without the need to pay again if each device is signed into the same Google Account. To download an app: Open Google Play. On your Android device, open the Google Play app . On your Computer, go to play.google.com. Search or browse for an app or content. Select an item. Select Install (for no charge items) or the item's price. Tips: To check that an app is reliable, find out what other people say about it. Under the app's title, check the star ratings and the number of downloads. To read individual reviews, scroll to the "Ratings and reviews" section. If you can't find an app you want to install, there are reasons why. Learn why you can't find an app. If you find an app that you think is harmful, report it to us. Learn how to report bad apps. Post to the help community Get answers from community members Latest Releases 31.1.1 31.1.1 31.0.4 Free and open source software for video recording and live streaming. Download and start streaming quickly and easily on Windows, Mac or Linux. High performance real time video/audio capturing and mixing. Create scenes made up of multiple sources including window captures, images, text, browser windows, webcams, capture cards and more. Set up an unlimited number of scenes you can switch between seamlessly via custom transitions. Intuitive audio mixer with per-source filters such as noise gate, noise suppression, and gain. Take full control with VST plugin support. Powerful and easy to use configuration options. Add new Sources, duplicate existing ones, and adjust their properties effortlessly. Streamlined Settings panel gives you access to a wide array of configuration options to tweak every aspect of your broadcast or recording. Modular 'Dock' UI allows you to rearrange the layout exactly as you like. You can even pop out each individual Dock to its own window. OBS supports all your favorite streaming platforms and more. Choose from a number of different and customizable transitions for when you switch between your scenes or add your own stinger video files. Set hotkeys for nearly every sort of action, such as switching between scenes, starting/stopping streams or recordings, muting audio sources, push to talk, and more. Studio Mode lets you preview your scenes and sources before pushing them live. Adjust your scenes and sources or create new ones and ensure they're perfect before your viewers ever see them. Get a high level view of your production using the Multiview. Monitor 8 different scenes and easily cue or transition to any of them with merely a single or double click. OBS Studio is equipped with a powerful API, enabling plugins and scripts to provide further customization and functionality specific to your needs. Utilize native plugins for high performance integrations or scripts written with Lua or Python that interface with existing sources. Work with developers in the streaming community to get the features you need with endless possibilities. Browse or submit your own in the Resources section OBS Studio is officially distributed as a Flatpak on Flathub and a PPA for Ubuntu 24.04 and newer. For other installation methods, including unofficial packages, click here. Flatpak Instructions You can install OBS Studio from Flathub here. If your distro is not already set up to install Flatpaks, you can follow the instructions here. Ubuntu Instructions (24.04+) Run these commands to install OBS Studio on Ubuntu via the official PPA: sudo add-apt-repository ppa:obsproject/obs-studio sudo apt update sudo apt install obs-studio You can browse the web on your iPhone or iPad with Chrome. On your iPhone or iPad, open App Store. In the search bar, enter Chrome. Tap Get. To install, follow the on-screen instructions. If prompted, enter your Apple ID password. To start browsing, tap Open. To open Chrome from your home screen, tap Chrome . Post to the Help Community Get answers from community members
