Classic Sudoku

Play the original
number puzzle game!

Sudoku is probably one of the best ways to spend a cold and rainy night alone at home. Loving a nine to nine-year-old Sowsu square is an extremely satisfactory and often difficult experience, which is why Sudoku has been so popular in recent years. But even if you think you have to wait for the next edition of your diary before getting another Sudoku solution, there is an increasing number of apps for iOS and Android that can fill the gap. In fact, the best Sudoku apps do more than replace the paper based on paper with a virtual equivalent. By introducing further ways and game activities, the apps that we deal at the bottom bring Sudoku to a completely new level and help you have more fun with one of your favorite brain relaxation and training methods. Now we are apologizing that many of these apps are called Sudoku and not something more creative. Although half a dozen apps with the same name are often a recipe for a serious confusion, we have clearly listed the name of the developer to help them distinguish them. Are you looking for apps you can use to play something different from Sudoku? Take a look at our list of the best chess apps or to our list of the best puzzle games ever. Sudoku.com Sudoku.com probably has the most complete Sudoku app. You can play Suroku's standard games and change the difficulty setting in order to carry out a regular journey or a more tiring test. It also offers a variety of daily challenges and seasonal events that give the app much deeper than you would expect from a so-called Sudoku app. Players can also accommodate the different functions that can be recalled to make the game a little more forgiving, including information, automatic control and repeated emphasis. There are also several statistical functions with which you can look at your progress, see your best moments and watch all your successes. The app contains about 10,000 individual Sudoku puzzles that can be played for free, but once you can pay 5 US dollars to remove advertising. Android iOS Southku by Brainium Studios Brainium Sudoku is available for Android and iOS and offers a very accessible and simple way to play Sudaku puzzles in digital form. You can choose between five levels of difficulty, while the game also offers various assistance as a tip button, automatic error test.Sudoku is undoubtedly one of the best ways to spend a cold and rainy night at home. Solving the new Sudoku square is a very satisfying and often difficult experience, and this is why Sudoku has proved so popular in recent years. Although you might think that you had to wait for the next magazine number to release another sweat adjustable magazine, iOS and Android systems are increasing in programs that can fill the void. In fact, the best Sudoku programs replace more than just replacing paper Sudoku virtual matches. Adding the game modes and additional activities, the following programs will take Sudok to a whole new level and help you enjoy one of your favorite ways to relax and develop your brain. Also, now we're sorry that we called most of these programs "Sudoku", not something more interesting. Although fifty programs can usually cause confusion, we've clearly stated the creator's name so you can tell them apart. Are you looking for programs that let you play something different than me? Check out the list of our best chess programs or a list of the best puzzles of all time. Sudoku.com Sudoku.com undoubtedly offers the most comprehensive Sudoku program on the market. This allows you to play standard Sudoku games, allowing you to change the complexity of setting up a smooth ride or a more complex test. It also features a variety of daily challenges and seasonal events, giving the program much more depth than you'd expect from the SO-called "Sudoku" program. Players can also customize many of the features that can be summoned to make the game a little more forgiving, including hints, auto inspection, and highlighting. There are also many statistical features you can use to monitor your progress, see the best times and follow all your achievements. The program contains about 10,000 unique Sudoku puzzles that are free to play, although you can pay a unique \$5 price for ad removal. Brivium Studios Android iOS Subdocument can be used for Android and iOS. Sudoku by Birinium offers a very accessible and easy way to play Sudoku puzzles in digital form. You can choose one of the five complexity settings and the game also includes a variety of AIDS, e.g.A good thing in the instructions for the application is that they help to understand how to play Sudoku, and not only indicate the correct answer. You can also choose from many motives, two mesh styles, light and dark mesh fonts, as well as vertical and horizontal orientation. The leaders' tables show the best players in the world and more advanced game options are available. Android iOS Andoko Sudoku 3 Andoko Sudoku 3 is one of the most popular Sudoku applications on Android, although, unfortunately, only on Android, I apologize to iOS fans. He offers the basic game mode in which you solve standard puzzles of Sudoku at one of the nine levels of complexity, and also offers four additional game modes, including color Sudoku and percentage. They are definitely funny if you are a little tired of an ordinary Sudoku, but the application copes with the fact that even a standard Sudoku is a lot of fun. The application contains all typical functions of assistance, such as notes and vice versa, as well as textbooks that will help you study various methods of solving Sudoku. Another good feature that there are no other Sudoku applications is an opportunity to create their own puzzles in case those who were provided by the application itself were not bad enough. The application also offers synchronization with the cloud, so you can start a riddle on your phone and continue it later on the tablet. Android »Sudokā zu à € PEOPLEFUN is the SUDOKU application, available only on iOS, which uses the basics of Sudoku and adds some additional functions. They include an intelligent assessment system in which the overall result is based on the values of each number multiplied by a number that decreases in time, forcing you to play quickly to get more points. It also contains online ratings that allow you to compare your results with elite players. Another surprise is that the application allows you to win the game only if you decide a puzzle with three or less errors, which means that you should be careful if you want to achieve progress. The game has thousands of different puzzles, as well as different levels of complexity. Sudoku iOS from Genina.com Sudoku Genina.com offers four levels of complexity, a simplified interface and automatic preservation with each closure of the application. Unlike other applications, he offers three introduction modes that allow you to determine the nearest types of games, first switching between the input of the number or cells. It also allows you to make notes, perform unlimited circulation operations and display advice in case you are stuck. You can also report your performanceA program that adds your stats to an online leaderboard. Real-time competitions are held regularly so you can battle against other players. Sudoku for Android ios by Volcano Entertainment Sudoku is a massive app that offers more than 15,000 puzzles to complete in eight difficulty levels. It has different Sudoku variations like Scatter, x and Color to keep things interesting. What also helps maintain interest is the ability to compete with online players in competitions, your puzzles, and career stats. Like most Sudoku programs, it has a help system to help you learn how to solve puzzles. It's also worth noting that it's one of the best-presented apps out there, including visual effects and animations, and the ability to switch to dark mode. Android iOS Sudoku AI Factory Free AI Factory Sudoku app for Android has 1500 puzzles and five difficulty levels and is an addictive version of the classic puzzle game. The interface is easy to navigate and use, optional hints and the ability to use assistant tools mean you will never get bored playing the app. With two different themes and fonts to choose from, and two input modes, you should be able to find a play style that suits your preferences. Another nice feature is the statistical tracking of each level, which allows you to compare your performance with other players. Android Sudoku Stupings.AI This iOS app is another complete Sudoku-only app with a different set of features than basic Sudoku. You can play in one of four difficulty settings with over 5000 puzzles. The app also offers daily challenges and different types of puzzles, including Sudoku. There are different motifs, dark mode, time mode and the ability to take notes and use hints. You can also share your progress with your friends, and the developers promise to add around 100 new puzzles every week. What's New on iOS Today: Check out Selected and Shortened Delivery Mail!
