If you play a lot of Minecraft, you probably had the joy of exploding something with TNT - or the discontent of being exploded. The TNT mod gives players 44 new and distinct ways to do the work, with more than three dozens of new TNT explosive blocks, some of which are capable of destroying a large amount of a world with a single applications O. It is destroying everything that you see if what you usually pass in minecraft, so this is a mod that you can not afford to pass. There are even a new minute (sulfur) that produces 5 pms when mined, just so that players can afford to make the new bombs. This new minute is as rare as gold, so it is not exactly easy to find, but there is enough of what you will not be hurting by Pólvore. You get your Basic Upgrades: TNT X5, TNT X20, TNT X100, TNT X500. But then you have larger bombs and Badder as well as nuclear weapons, meteortht, and the specially designed mining, which explodes large holes along the x-axis and z, but is relatively little damage rising and going down; As soon as you put torches in the caves covered for you. If you like to explode things, you will love this mod. Very TNT Mod for Minecraft Changelogs Fire and Dynamite Snow are smaller. Created a free roaming delay for the Meteorttnt NOVERIO. Added guides for my mod in creative mode. Renamed Enderbomb, Flatbomb and MiningFlatBomb for Endertnt, Flattnt and Miningflattnt. Mod Showcase: How to install a lot of TNT mod? It is a Basic Construction Block for Other TNT. Explosion: Weteortnt: The biggest TNT of all. Have a long time of fuse for you to flee, then be patient and do not think it's broken. Is delayed, but it works well, even for laptops. Explosion: will end as a circular culcule and leaves behind fire and obsidian of the  $\tilde{A} \, \hat{a} \, \in \, \mathbb{M} \, \hat{a} \, \hat{e} \, \hat{a} \, \hat{$ twice smaller on the y-axis. It also generates torches for you. This TNT is the best to find rare minions: Easy to find rare minions: Housetht: An incredible TNT creating a home for you. "Timo to take some of them if you are exploring and getting dark. Explosion: Vaporizett: It will only destroy water and lava and just starfoff other vaporizetnt. So, do not try to blow it up on land. Until even destroy blocks of other mods. Really amazing to clean the lakes, or make a hole in the ocean. This needs to process if a block is water / lava or not, so it takes longer to explode (about 10 seconds) explosion: before: after: oceant: It will make a flat layer of parallel water where he was on the y-axis. Very large, and that's why it's called Oceantt. Explosion: Before: After: Bugs for Oceant: A bug is that if a cave is a certain distance from the explosion, then the water imitates the shape of the cave. (You can see this in the photo I took 2 above). It will not be displayed if bursting at high altitude. Video: How to install: Download and install Minecraft Forge. Download the mod. Go to % AppData%. The fact that players have been free to build their world (s) because they favor limits to the achievable development goals. Play Minecraft with the most exciting hacks and mods allows players to adopt a more aggressive development strategy as most worldly tasks are easily made. The TNT mod for Minecraft is one of the most powerful hacks available for this interesting game. Creating more than 44 new ways to blow up things in the game, this mod is definitely what you expect to take the game for a new level. TNT MOD® 1.12.2 "Give players access to up to 36" new explosive blocks. This gives players the ability to blow up a large number of things in their world, including large parts of the world. The hack also M makes several activities in the easiest game to carry out the creation of new shelters. Players who like to explode things in Minecraft will definitely enjoy using this very modern mod who guarantees that they have access to sufficient powder, although it is one of the rarest features of the game. With TNT Mod I 1.12.2, players access large destructive pumps, including nuclear weapons, miningflattnt and meteortnt. Each of these bombs comes with different capabilities. For example, the MiningFlattnt pump is used in the creation of new mines, because it has a lot of harmful energy along the axles X and Z, but very little on the y-axis. The pump until far, the torches of lighting in the mines are used to create. Another interest bomb Santante is the housetnt, which allows the easy and round of housing, especially when exploring your world in the dark. The biggest bomb is the meteortht. This pump is used to create expansive damage in the world that is used. It results in a huge crater similar to the impact of a meteor in the surface of the world. When using this feature TNT mod â "¢, you will notice that it takes a lot to detonate. This is to provide enough time to run from the explosion zone. Most of the powerful explosives in this mod comes with this time delaying feature too.
