No film has captured how exhilarating it is to be stuck in an inefficient workplace, as much as the beloved "Office Space" comedy. One of the above mentioned scenes of the film concerns the repeated passive-aggressive reproach of the film's protagonist, Peter, receives after having forgotten to follow a new policy issued by his employer, the technology company without soul Initech. What was Peter's unforgivable crime? You forgot to attach a recently published cover page to the TPS report. Mundane, however, IntegralThe movie implies that TPS relationships are banal, but integral, aspects of daily operations at Initech, something Peter has distributed regularly. We soon learned that the management of Initech has recently sent a reminder to the entire company that warns everyone about a new policy that requires that a 11 TPS reports now include a specific cover page a. We can deduce that, Although the memo itself was not fascinating and was not accompanied by other efforts to explain or underline the importance of this new policy, Initech's management considered the adoption of the new policy critica l. Peter's negligence spreads rapidly throughout the workplace, and the consequences of the forgotten cover page serve as a catalyst for the rest of the film's jokes. Management Meseed Up, not PeterIn Office Space, the TPS report and the cover card represent everything that does not go with the culture of the office. But state relations, performance metrics and other unopened documents are inevitable and necessary in every office. I would like to point out that the incident in the TPS report is an example of poor management of change, rather than a symbol of everything that does not go in the modern workplace. A department could adopt a new accounting accounting. An organization could undergo a rebranding effort that forces everyone to apply a new layout to all publications.While these changes may seem trivial, they are all examples of small improvements essential to the health and success of the company, it is critical that all employees fully accept and implement the new practices...When it's managed effectively Ensuring smooth change requires careful planning, management, and communication, no matter how big or small the change is.; you can't just send a memo. In order to convince people to better adapt, or even accept, a change in office policy or process, you need to get buy-in from everyone who will be interested. You need to make sure everyone understands why change is needed, what the benefits of change will be (or, in some cases, what the risks of not changing) and what actions will be required of everyone. You also need to make the new practice as simple and accessible as possible to everyone, and make the old practice harder.In the next post, I will provide some strategies and tips to ensure a more effective policy change, using Initech's TPS coverage scenario as an example. However, in modern cubicle culture, TPS is an acronym for "Totally Pointless Stuff", made famous in the movie Office Space. TPS reports are meaningless documents that have to be filled out but no one reads them.
