If you are damage, please notify your supplier simultaneously. You, the recipient, must distinguish any request. Please keep all the packages in the event of future re-shipment. Getting Started 0 10 Level on Sig Limit 0 80Hz or 125Hz 180 or filter phase 1. Rotate the fully anticlockclockwise level control (m in). 2. Connect the outputs of the left and right mixing console to the line in the connectors via 2-pole or 3-pole or balanced XLR sockets. 3. Connect the XLRS output to the half-high speakers to the right and right. 4. Connect additional additional subwoofers to the connection outputs 5. Turn on the mixer or other source and make sure that the output faders or the master output level commands are completely below. 6. Connect the AC power cable to the Milan speaker and turn on the network switch. The LED on the LED light up to indicate that the network power is connected. 7. Increase the output level of the signal source to a normal operating level. 8. Slowly raise control of the Loudspeaker level in Milan until a suitable volume level is reached. The LED of the MREM LIMIT will illuminate the green to indicate the present and red flash signal occasionally to indicate to limit, but excessive or prolonged limiting lighting indicates that the input signal is required to be needed too high or additional speakers. 9. The filter switch selects the low passage frequency of the subwoofer and allows you to choose the crossover frequency to which the high pass signal is sent to the metÄ / alti cabinets. Experience to get the best results for your loudspeakers. It is also possible to reverse the secondary signal phase relating to the medium / high signal using the phase switch. The ground lift switch reduces the hum if there is a land cycle. Note that all equipment must be connected to the ground. 10. When the Milan system closes, lower the input level controls, then turn off the mains power before turning the mixer or the signal source. Output connection line right on the right in the QuickStart Milan M18 MILAN M18 guide QuickStart Guide V1.0 - - 1 1 1
