What kind of driver are you? The driver profile tracks the player's progress as a racer from event to event. This system consists of a driver's on-track personality, their achievements, and all accumulated profile points and badges, which combine to create a customized career and gaming experience. The driver profile is ubiquitous in all modes: Career and Online. Learn more When a player crashes into a static object or an opponent's car, it will feel like they are "taking damage". The combination of visual and audio effects leaves the player disoriented and stops the race for a short while. More info Almost 70 licensed cars available, including Pagani Zonda F, Audi RS4 and Porsche 911 GT3 RSR. There are also over 15 real-world locations such as Willow Springs and Laguna Seca, as well as fictional racetracks such as Central London and Tokyo. Additional information Need for Speed™ SHIFT™ SHIFT has a deep customization option that allows the player to customize every aspect of the car's performance and style. Get under the hood and upgrade and tune your vehicle to increase its performance. The visual customization system allows players toboth outside and inside to reflect their individual style and preferences. Learn more Various visual cues deliver a true driving experience, including a 3D HUD that simulates the driver's head movement, inertia and g-forces. The depth of field is also adjusted to the speed of the vehicle; therefore, when the vehicle is moving at high speed, the perspective will shift to the distance, causing the vehicle/cabin to be out of focus.
